- AI prompting

## SOFTWARES

- Figma, Figjam
- Jira
- Balsamiq
- Gemini, ChatGPT
- Lovable

## PROFESSIONAL OVERVIEW

Empathetic UI/UX Designer with a decade of experience as an Occupational Therapist specializing in vision rehabilitation. I bridge the gap between clinical human needs and digital solutions, creating accessible, intuitive, and inclusive products. I am dedicated to the principle that technology should enable, not disable, by applying deep expertise in human factors and assistive technology to modern digital design.

## WORK EXPERIENCE

### UI/UX Designer (Internship)

Doro, Malmö | January 2026 – July 2026

- Designing and prototyping a senior-focused mobile application with a focus on accessibility and cognitive ease.
- Conducting user testing and iterative design to ensure the platform empowers independence for the aging population.
- Collaborating with stakeholders to align technical constraints with high-fidelity, inclusive design solutions

### Occupational Therapist & Vision Rehabilitation Specialist

Region Skåne & Malmö Stad | 2014 – 2024

- Specialized in vision rehabilitation for patients with visual impairment and blindness, working in close collaboration with optometrists and psychologists.
- Managed district-wide rehabilitation, including clinical assessments, trials of assistive devices, and housing adaptations to ensure user independence.
- Prescribed optical and medical devices and led full-day educational sessions for home care staff on mobility and assistive technology.
- Designed and facilitated weekly rehabilitation programs (e.g., Otago Exercise Program) focusing on sensory exercises and body awareness.
